

Infrastructure Advisory

Unlock the full potential of your capital assets

Advisory services help project owners maximize the success of their capital projects and programs by enabling meticulous planning, strategic decision making and efficient project execution. Gathering relevant project data, valuable market insights, supplier interest and procurement options with the help of specialized infrastructure advisors further empowers you to manage capital projects and identify customized solutions that meet your specific needs.

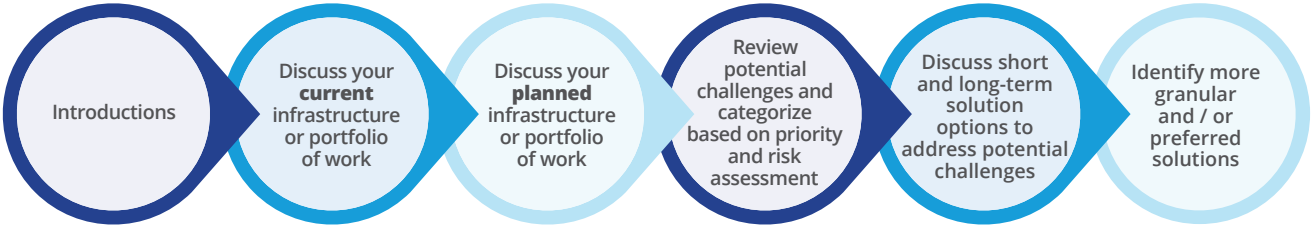

Our advisors collaborate with you to create strategies, evaluate options, validate project feasibility, assist in securing necessary funding, facilitate stakeholder engagement, forecast cost projections, assess organizational capability, and much more. From comprehensive strategy development to rigorous project due diligence and change management, advisory services enable you to transform new and existing infrastructure into high-performing assets that deliver exceptional value, operational efficiency and long-term success.

Project
Leaders

Setting projects up for success

Working with a team of infrastructure advisory specialists, you'll benefit from comprehensive guidance, support and expertise throughout your project lifecycle. Starting with a thorough discovery process, your project scope, goals and challenges are clarified and kept top-of-mind, leading to more holistic strategies and plans, clarity on risks and opportunities, and more accurate cost estimates and schedules that enable you to make informed decisions and effectively allocate resources. Additionally, you gain the advantage of a project management approach that is rooted in data rather than assumptions. By proactively addressing portfolio, program and project needs, costly changes are minimized, reducing disruptions and maximizing efficiency.

Proud FNMPC Sustaining Partner

The First Nations Major Projects Coalition (FNMPC) focuses on strategies that promote meaningful Indigenous inclusion in major developments and Indigenous perspectives concerning Environmental, Social and Governance investment standards and sustainable business practices.

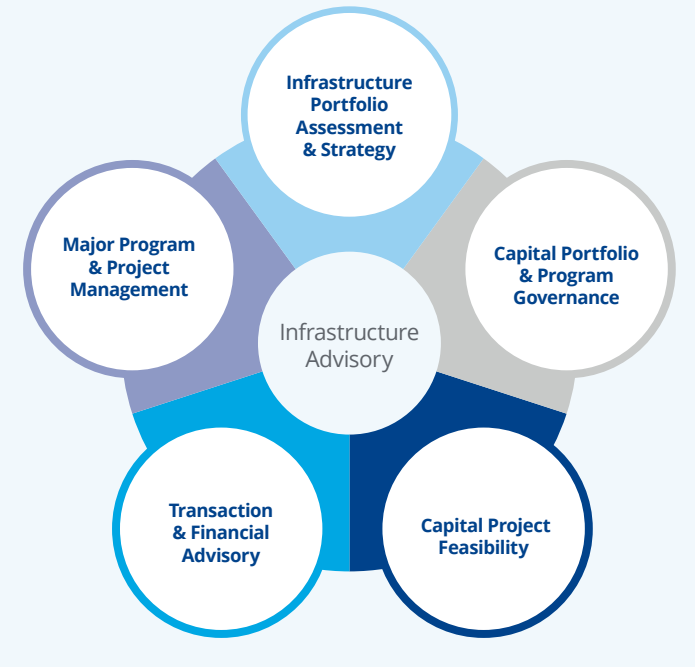

As a proud Sustaining Partner and an organization committed to advancing progressive Indigenous business initiatives, we work with the FNMPC to provide commercial and financial advisory services to its members.

Maximize the benefits of advisory services

Enhance your decision-making process and benefit from reduced project costs and proactive risk management by leveraging our expert advice and insights at every stage of your project. We help you maximize productivity by developing effective asset management strategies, conducting performance evaluations and supporting you during contract structuring and negotiations.
